

# FREDDIE TRIMS A TREE

A Windows game made on [Klik & Play](#).

This is a Christmas game I made on [Klik & Play](#). It is in the Sierra Adventure game style (Like Kings Quest, Space Quest, etc.). You're a Fox named Freddie. You walk from screen to screen finding objects and using them. The goal is to decorate a tree for Mrs. Wolfington.

I started working on this game for the Christmas of 95 but did not finish it until the Christmas of 96. Although this game has been around for a while, it is still quite a fun game to play.

## Features

-  Lots of graphics! I drew all the graphics myself. This game has a lot of graphics for its length.
-  Christmas music! Great midi music. There's a different song for each screen.
-  A slide show opening! The opening consists of eight full screen pictures.
-  Three different endings! The endings are in the slide show style just like the opening. Try to see them all.
-  Easy to use user interface! Picking up items, using them, and walking from screen to screen is just as easy as using the mouse.
-  Windows help file! The help file explains exactly what you need to know to play the game.

# Download it!
